DOCUMENT DETAILS

Document Version:

Release Date:

1. Requirements & QA Expectations

- ☐ *Requirements are formally documented and approved*
- ☐ *Requirements are clear, unambiguous, and testable*
- ☐ *Functional and non-functional requirements are identified*
- ☐ *QA team clearly understands business expectations*
- ☐ *Acceptance criteria are defined for each requirement*
- ☐ *Changes to requirements are communicated to QA*
- ☐ *Requirement changes are version controlled*
- ☐ *Impact analysis is performed for requirement changes*
- ☐ *Requirements traceability matrix (RTM) exists*
- ☐ *All requirements are mapped to test cases*

2. Test Planning

- ☐ *Test Plan is created and approved by stakeholders*
- ☐ *Test scope (in-scope / out-of-scope) is clearly defined*
- ☐ *Test objectives align with business expectations*
- ☐ *Test strategy and approach are documented*
- ☐ *Test levels and test types are defined*
- ☐ *Test environment requirements are documented*
- ☐ *Entry and exit criteria are clearly stated*
- ☐ *Risks and mitigation strategies are identified*
- ☐ *Roles and responsibilities are defined*
- ☐ *Test schedule and milestones are realistic*

3. Test Design & Test Cases

- ☐ *Test cases are derived from approved requirements*
- ☐ *Test cases follow a standard format*
- ☐ *Each test case has:*

Test Case ID

Test Description

Preconditions

Test Steps

Expected Result

- ☐ *Positive test scenarios are covered*
- ☐ *Negative test scenarios are covered*
- ☐ *Boundary value conditions are tested*
- ☐ *Test data is clearly defined*
- ☐ *Test cases are reviewed and approved*
- ☐ *Test cases are traceable to requirements*

4. Test Execution

- ☐ *Test execution follows the approved test plan*
- ☐ *Test cases are executed in the correct environment*
- ☐ *Actual results are recorded clearly*
- ☐ *Test evidence (screenshots/logs) is attached where required*
- ☐ *Test results are updated in the test management tool*
- ☐ *Blocked or failed tests are properly reported*
- ☐ *Re-testing is performed after fixes*
- ☐ *Regression testing is conducted when required*

5. Defect Reporting – Structure & Quality

- ☐ *Defects are logged in an approved defect tracking tool*
- ☐ *Defects follow a standard defect structure, including:*

Defect ID

Summary / Title

Detailed description

Steps to reproduce

Expected result

Actual result

Environment details

Severity

Priority

Attachments (screenshots/logs)

- ☐ *Defect descriptions are clear and reproducible*
- ☐ *Severity and priority are correctly assigned*
- ☐ *Duplicate defects are avoided*
- ☐ *Defects are linked to test cases and requirements*

6. Defect Lifecycle Compliance

- ☐ *Defects follow the defined defect lifecycle*
- ☐ *Typical defect statuses are used correctly:*

New

Open

Assigned

Fixed

Retest

Reopened

Closed

Deferred / Rejected

- ☐ *Developers acknowledge and analyze defects*
- ☐ *QA verifies fixes through re-testing*
- ☐ *Reopened defects are tracked properly*
- ☐ *Defects are closed only after successful validation*
- ☐ *Deferred or rejected defects have valid justification*

7. Test Environment & Configuration

- ☐ *Test environment matches production requirements*
- ☐ *Environment details are documented*
- ☐ *Environment issues are logged and tracked*
- ☐ *Configuration changes are controlled and communicated*
- ☐ *Access permissions are correctly managed*

8. Reporting & Metrics

- ☐ *Daily / weekly test execution reports are available*
- ☐ *Defect metrics are tracked (open, closed, severity-wise)*
- ☐ *Test coverage metrics are reported*
- ☐ *Test summary report is prepared*
- ☐ *Stakeholders receive regular status updates*

9. Compliance & Process Adherence

- ☐ *QA process follows organizational standards*
- ☐ *Testing activities align with SDLC phase*
- ☐ *Audit findings are documented*
- ☐ *Corrective and preventive actions (CAPA) are identified*
- ☐ *Process improvements are recommended*

10. Test Closure

- ☐ *Exit criteria are met*
- ☐ *All planned tests are executed*
- ☐ *No critical or high defects remain open (or approved exceptions)*
- ☐ *Test artifacts are archived*
- ☐ *Lessons learned are documented*
- ☐ *Formal QA sign-off is completed*
