Document Purpose

This Test Plan defines the testing strategy, scope, approach, resources, schedule, and deliverables for the project. It ensures that all testing activities are planned, controlled, and aligned with business and quality objectives.

Confidentiality Statement

This document is classified as:

☐ *Public* ☐ *Internal* ☐ *Confidential*

1. Scope

This Test Plan covers all functional testing activities required to validate the system against approved requirements.

In Scope

- *Functional testing of system features*
- *Integration testing between modules*
- *Regression testing after defect fixes*

Out of Scope

- *Performance testing*
- *Security testing*
- *Production deployment testing*

2. Test Objectives

The objectives of testing are:

- *To verify that the system meets approved requirements*
- *To identify defects early in the development lifecycle*
- *To ensure the quality and reliability of the application*
- *To confirm readiness for release*

3. Test Items

The following items will be tested:

- *Application modules and features*
- *User interfaces*
- *System integrations*
- *Data processing functions*

4. Requirements and QA Expectations

- *All requirements are formally documented and approved*
- *Requirements are clear, complete, and testable*
- *Acceptance criteria are defined for each requirement*
- *QA has a clear understanding of business expectations*
- *Requirement changes are communicated and tracked*
- *A requirements traceability matrix (RTM) is maintained*

5. Test Approach

Testing will be performed using the following approach:

- *Test Levels: System Testing, User Acceptance Testing*
- *Test Types: Functional, Regression, Smoke, Sanity*
- *Testing Method: Manual testing*
- *Tools: Test management and defect tracking tools (e.g., Jira)*

6. Test Environment

Testing will be conducted in a controlled test environment that closely resembles production.

Operating System

Browser / Platform

Database

Test Tools

7. Test Data

- *Test data will include valid, invalid, and boundary values*
- *Test data will be prepared prior to test execution*
- *Sensitive data will be masked or anonymised*

8. Entry and Exit Criteria

8.1 Entry Criteria

- *Requirements are approved*
- *Test environment is available*
- *Test cases are reviewed and approved*
- *Test data is prepared*

8.2 Exit Criteria

- *All planned test cases are executed*
- *No critical or high-severity defects remain open*
- *Test summary report is completed*
- *Stakeholder approval is obtained*

9. Test Deliverables

The following deliverables will be produced:

- *Test Plan*
- *Test Cases*
- *Test Execution Results*
- *Defect Reports*
- *Test Summary Report*

10. Roles and Responsibilities

<i>Role</i>	<i>Responsibility</i>
<i>QA Engineer</i>	
<i>Test Manager</i>	
<i>Developer</i>	
<i>Product Owner</i>	

11. Test Schedule

<i>Phase</i>	<i>Start Date</i>	<i>End Date</i>
<i>Test Planning</i>		
<i>Test Design</i>		
<i>Test Execution</i>		
<i>Test Closure</i>		

12. Defect Management

- *Defects will be logged in the defect tracking tool*
- *Defects will follow a standard structure, including:*
 - *Defect ID*
 - *Summary*
 - *Description*
 - *Steps to reproduce*
 - *Expected and actual results*
 - *Severity and priority*
- *Defects will follow the defined defect lifecycle:*
 - *New → Assigned → Fixed → Retest → Closed / Reopened*

13. Risks and Mitigation

Risk	Impact	Mitigation
<i>Requirement changes</i>	<i>High</i>	<i>Change control process</i>
<i>Environment issues</i>	<i>Medium</i>	<i>Backup environment</i>
<i>Limited testing time</i>	<i>Medium</i>	<i>Prioritised testing</i>

14. Test Metrics and Reporting

The following metrics will be tracked:

- *Test case execution progress*
- *Defect count by severity*
- *Defect closure rate*
- *Test coverage*

Test status reports will be shared regularly with stakeholders.

15. Assumptions and Constraints

Assumptions

- *Requirements remain stable during testing*
- *Test environment is available as planned*

Constraints

- *Limited testing timeframe*
- *Limited testing resources*

16. Approvals and Sign-off

<i>Name</i>	<i>Role</i>	<i>Signature</i>	<i>Date</i>
-------------	-------------	------------------	-------------
